

## The Solution to Rising Commercial Energy Costs

In an economic environment where energy prices are skyrocketing, solar energy is one of the easiest and smartest ways to control the cost of doing business. Akeena Solar understands the role of sustainable systems in business, and believes that producing clean electricity directly from the sun is the right thing to do, both for our economy and the environment.

### Did you know . . .

- Financing, rebates and tax credits can pay 100% of the costs of taking your business solar
- Commercial enterprises can get a 30% Federal Solar Investment Tax Credit and take advantage of 5-Year Accelerated Depreciation
- Tax credits and accelerated depreciation combine to provide positive cash flow for most commercial solar power installations in the very first year
- Akeena Solar systems qualify you for a variety of generous rebate programs in most states
- The cash break-even point for an Akeena Solar system averages just 4-10 years
- An overall 10-15% ROI is typical for most commercial solar power installations

### Choose Experience, Value, and Service

Akeena is a licensed A, C-10, and C-46 Solar Contractor, and a member of the North American Board of Certified Energy Practitioners (NABCEP). To maintain the quality of our products and services, we only use on-staff engineering teams for installation, never electrical sub-contractors.

We understand that your business can't be put on hold while you install a solar power system, so we've made our process a near-turnkey experience. Akeena's certified on-site engineers manage every aspect of our commercial installations, from design and permits through installation, inspection, and securing customer rebates.

## Industry-Leading Technology Delivers High-Performance

Akeena Solar offers Andalay™, the first truly integrated solar power system. Andalay's high-efficiency solar panels deliver unparalleled performance, reliability and maximum power per square foot of installation.

Andalay's fully integrated racking, wiring and grounding, technology delivers:

- **High Performance** – Advanced, high-efficiency monocrystalline panels specially designed to provide decades of energy output
- **Reliability** – Fewer parts, built-in ground, and weather-resistant electrical connections delivering unprecedented reliability
- **Room to Grow** – Because panels fit together more densely than ordinary solar panels, Andalay conserves your building's available roof area to allow for expansion of your system in years to come
- **Complete Support** – Akeena Solar covers all Andalay installations with an industry-leading 25-year warranty

## About Akeena Solar

Founded in 2001, Akeena Solar (NASDAQ: AKNS) is one of the largest national installers of residential and commercial solar power systems in the United States. Akeena Solar reinforces its commitment to the environment by using clean, renewable sources of energy and green business practices.

## Call Today for a **FREE** Solar Evaluation

Contact Akeena Solar today at 888-253-3628, or visit us on the Web at [www.akeena.com](http://www.akeena.com), and one of our experienced solar power professionals will schedule an appointment with you for a free evaluation.
