

Homeowners are seeking out ways to lower energy bills, improve their home's efficiency, and reduce their carbon footprint. Solar power is a clean renewable resource, and the greenest cost-effective way to save money while increasing home value and protecting the environment.

Akeena Solar: Making the World a Better Place, One Roof at a Time

At Akeena Solar, we believe that producing clean electricity directly from the sun is the right thing to do for our environment and economy. By providing homeowners across the country with affordable alternatives to traditional power sources, Akeena Solar has grown to become one of the largest national installers of residential and commercial solar power systems in the United States.

Top Five Reasons to Go Solar with Akeena

1. Experience, Value, and Service:

- Akeena Solar is a leader in solar power systems since 2001, with more than 2,000 installations
- Certified Akeena Solar personnel manage every installation aspect; design, permits, installation, inspection, and rebates
- Akeena Solar offers a variety of financing options to suit individual needs and make it easy to go solar

2. Industry-Leading Technology:

- Akeena Solar offers Andalay™ - The next generation in solar power systems, with innovative framing and electrical design that brings solar power systems into the twenty-first century
- Andalay integrates racking, wiring and grounding for top reliability, performance and exceptional design

3. Lower Energy Bills:

- Instantly reduce monthly energy costs by installing an Akeena Solar energy system
- Feed surplus energy back to the electric utility for daily credits that reduce current and future bills

4. A System that Pays for Itself:

- System designed to last 30 years or more, and it can pay for itself in as little as five years
- Many states, cities, and federal programs reduce up to 30% of the cost of the system
- Housing Industry experts estimate that every utility dollar saved adds \$21 to a home's value

5. Protect the Environment, and the Economy:

- Powering with clean, renewable solar energy eliminates an average of 120 tons of CO2 emissions
- Preserve the future by reducing the depletion of our planet's finite natural resources and reduce dependence on non-renewable foreign fuel sources

Andalay: A Whole New Look to Solar Power

Andalay is an integrated high-performance solar system delivering unparalleled reliability by using a unique, streamlined installation with stronger frame structure, grounding, and weather protected components.

Choose Andalay for:

- High Performance – Advanced, high-efficiency system that will provide decades of performance
- Reliability – Fewer parts, and integrated weather-resistant connections for minimal maintenance
- Great Design – Sleek, unobtrusive design blends with the roof like a streamlined skylight
- Warranty – Industry-leading warranties for the life of the system

About Akeena Solar

Founded in 2001, Akeena Solar (NASDAQ: AKNS) is one of the largest national installers of residential and commercial solar power systems in the United States. Akeena Solar reinforces its commitment to the environment by using clean, renewable sources of energy and green business practices.

Call Today for a **FREE** Solar Evaluation
